

Core Banking Glossary for Application Teams

Use this glossary when reading specs, incidents, or regulatory mail.

General Ledger (GL): system of record for balances and postings. Sub-ledgers (e.g. loans, deposits) roll up to GL.

Chart of Accounts: hierarchical structure of accounts; changes require finance approval and migration windows.

NOSTRO/VOSTRO: our bank's account at a correspondent vs. their account at us - critical for reconciliation.

EOD/BOD: end-of-day and beginning-of-day batch windows. No structural releases during batch unless approved.

Interest accrual vs. interest application: accrual posts daily economic cost; application realizes cash movement.
